

# STREAMLINED TRIAL MASTER FILE MANAGEMENT WITH OOMNIA eTMF

Manage your documents efficiently and be inspection-ready at any time

oomnia eTMF is an integral part of our unified clinical trial software. Digitally capture, store, manage, approve, and share trial documentation with ease while remaining compliant with regulatory guidelines and requirements. oomnia quickly customizes every form to trial-specific requirements, which is 3-5 times faster than the competition, leading to faster trial start-up times.

- ✓ Enhanced oversight
- ✓ Real-time reporting
- √ Flexible eTMF structure
- ✓ Increased collaboration

## BENEFITS OF OUR UNIFIED eTMF

**Boost your clinical trial success** 

#### **EXCEPTIONAL QUALITY**

Real-time integrated graphical reports ensure that the eTMF is completely inspection ready, and changes are traceable. A full audit trail ensures enhanced transparency and traceability.

#### **ENHANCED FLEXIBILITY**

The eTMF structure can be adapted to match trial-specific demands. Moreover, oomnia eTMF accelerates setup by 3-5 times, boosting efficiency and easily adjusts to changes.

### **ERROR REDUCTION**

Pre-created placeholders provide users with a clear framework, reducing the likelihood of errors when uploading documents.

Integrated graphical reports allow for the easy detection of missing documents.

#### TIME SAVINGS

An eTMF can be set up for a new study by reusing eTMF index and structure from previous trials. Furthermore, training time is reduced by reusing roles and permissions.

#### **COST SAVINGS**

The system is able to run multiple trials on a single instance, reuse eTMF structures, as well as user roles and permissions.

# ADVANCED FEATURES OF OOMNIA eTMF

Unlock the full potential of your clinical trials

RELIABLE ACCESS CONTROL AND SECURITY		
FEATURES	DESCRIPTION	
Automatic access level control	User only have access to part of the eTMF appropriate to their Role and Organization	
	<ul> <li>Easily set access rights for eTMF Zones, Sections, and Artifact folders for trial, country, and site-level documents</li> </ul>	
	<ul> <li>Automatic detection of user's organization for access level control</li> </ul>	
Transparent document access	Eliminate redundancies and reconciliations by only upload documents once	
	<ul> <li>Easily set Zone, Section, and Artifact folders to be visible for more than one Country or Site</li> </ul>	
	<ul> <li>Granularly control document le- vel permissions for documents which are visible to multiple Organizations including Upload, Download, View, Query, Approval, and more</li> </ul>

FEATURES	DESCRIPTION	FEATURES	DESCRIPTION
Automatic access level control	<ul> <li>User only have access to part of the eTMF appropriate to their Role and Organization</li> <li>Easily set access rights for eTMF Zones, Sections, and Artifact folders for trial, country, and site-level documents</li> <li>Automatic detection of user's organization for access level control</li> </ul>	Simplified file and data upload, approval, and storage	<ul> <li>Pre-created placeholders provide users with a clear framework, reducing the likelihood of errors when uploading documents</li> </ul>
		Automated document indexing and categorization	The organization of documents can be optimized through automated indexing, categorization, and tagging
Transparent document access	<ul> <li>Eliminate redundancies and reconciliations by only upload documents once</li> <li>Easily set Zone, Section, and Artifact folders to be visible for more than one Country or Site</li> <li>Granularly control document level permissions for documents which are visible to multiple</li> </ul>	Search and filter functions	<ul> <li>An advanced filter functionality displays relevant content depending on user-defined criteria</li> <li>Sort and categorize the display of documents based on specific criteria</li> </ul>
	which are visible to multiple Organizations including	DECLII ATODV COMPLI	IANCE

ENHANCED VERSIONING AND CHANGE TRACKING		
FEATURES	DESCRIPTION	
Integrated query and discrepancy resolution	User directed queries communicate and highlight document discrepancies	
	<ul> <li>Enhanced document accuracy and integrity, with streamlined resolution of documentation issues</li> </ul>	
Dynamic document ma- nagement and reporting	Comprehensive management of document progress and status, real-time insights on uploads, approvals, and timeliness	
	Real-time monitoring integrated graphical reports is included for eTMF completion tracking	
Real-time change tracking	<ul> <li>Full audit trail, including modifications to eTMF structure and specific documents or placeholders</li> </ul>	
Automated version control and audit trails	<ul> <li>Automatic versioning of uploaded documents</li> <li>Preview and approval are</li> </ul>	
	provided at the document version level	

REGULATURY COMPLIANCE			
FEATURES	DESCRIPTION		
Flexible TMF Reference model implementation	<ul> <li>Based on the CDISC TMF refence model out of the box</li> <li>Easily implement ISO14155:2020 reference model for medical device investigations</li> </ul>		
	<ul> <li>Flexible enough to adapt to any Sponsor- or CRO-specific TMF structure that may be in use.</li> </ul>		
Reporting	<ul> <li>Real-time integrated eTMF reports ensure compliance with regulatory requirements by enabling comprehensive document management and oversight of TMF progress, quality, and completeness</li> </ul>		
Audit Trails	<ul> <li>Export human readable audit trails in .csv and .xlsx formats with the capability to filter for required data</li> </ul>		

EFFICIENT DOCUMENT ADMINISTRATION

AUDIT AND INSPECTION READINESS			
FEATURES	DESCRIPTION		
Versatile export options	<ul> <li>CSV and XLSX export facilitates efficient data handling and report generation</li> <li>Batch document export options</li> </ul>
